DETAILED ACTION

Double Patenting

1. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,521,950 in view of Wanlass (U.S.Patent No. 3,881,175).

The only difference between the instant claims and those of the U.S.Patent 6,521,950 is the formation of "self-aligned circuitry" as recited in claim 1 of the instant application.

However, self-aligned circuitry on Silicon on Sapphire system is quite well known as taught by Wanlass (col. 3, lines 32-38).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the self-aligned circuitry technique as taught by Wanlass to the instant device to provide a reliable method for fabricating high-speed, high-density memory subsystems that is relatively inexpensive which will also decrease bonding requirements and lends itself to automatic fabrication (col. 2, lines 18-26).

2. Claims 10-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,617,187 and claim 7 of U.S.Patent No. 6521,950 in view of Merriam Webster College Dictionary, Tenth Edition, P 457.

Application/Control Number: 10/614,426

Art Unit: 2871

The main difference between the instant claim 1 and that of U.S.Patent No. 6,617,187 is the step of 'affixing' vs. 'forming' a sapphire substrate to a single crystal (epitaxial) silicon structure).

The word 'form' is defined by the Merriam Webster College Dictionary as: 'to arrange themselves', 'to arrange in order'.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the word 'forming' in place of 'affixing' such that the sapphire substrate and the single crystal silicon structure can be arranged in an order (see Merriam Webster College Dictionary, P 457).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prasad R Akkapeddi whose telephone number is 571-272-2285. The examiner can normally be reached on 7:00AM to 5:30PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/614,426

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
